

Posterior predictive distribution

The posterior is full of lines

```
post <- extract.samples(m3.2)
plot( d2$height , d2$weight , col=2 , lwd=3 ,
      xlab="height (cm)" , ylab="weight (kg)" )
for ( j in 1:20 )
  abline( a=post$a[j] , b=post$b[j] , lwd=1 )
```
